

Web-Based DHIS Daily Data Capture (DDC) and Rapid Internal Performance Data Audit (RIPDA)

AIM

To set up data files for daily data capture within a facility so that data quality in health facilities can be improved by ensuring alignment between registers/input forms and DHIS—using WebDHIS.

To assess the accuracy of the information entered into the DHIS by auditing the facility data

TARGET GROUP

Health facility personnel involved in data collection, processing and use of information

- The district information officer
- The district support partner
- The sub-district information officer
- The facility supervisor
- The facility manager
- The facility information manager/data capturer

OBJECTIVES

By the end of the 3 day course, participants should be able to have improved levels of knowledge, skills in:

- Understanding issues around dataflow at the facility
- Guidance on Practical changes that may need to be implemented at the facility
- Maintaining a daily data file
- Structured daily and monthly data validation
- Data completeness checks
- Basic understanding of WebDHIS
- Data entry, Data set reports, Report tables, Create a report and a chart and using the dashboard in the WebDHIS
- Auditing facility data and registers
- Understanding the AG requirements

The course will use the clinic data and will focus on technical issues and skills. Participants will work individually or in small groups.

COURSE CONTENT

The course will be based on the clinic data from facilities and districts in South Africa.

Participants will work on:

- Principles of daily capturing
- Facility walkabout
- Identify Service points in the facility
- Identify Services rendered from each service point
- Identify Practical changes that need to be implemented (1 entrance/exit)
- Web DHIS introduction
- Data entry, Data set reports, Report tables, Creating a report and a chart and use the dashboard in the Web DHIS
- Various data quality and data validation checks
- Identify challenges with facility data and data flow
- Provide feedback report to facility after the visit
- Checking Registers
- Checking DHIS monthly reports
- Checking Facilities policies
- Use the Audit Profiles

PRE-REQUISITE

It is assumed that you should already be competent in terms of the following areas of learning before attending this program:

- Data Capture
- Basic computer skills
- Basic understanding of the DHIS
